

TRBOserver: Avigilon Integration

Enhancing notifications capabilities

TRBOserver is a versatile integrated and multi-site server that brings Avigilon VMS systems many options for bi-directional alarm and notifications capabilities. It notifies different types of users and devices, including analog and digital 2-way radios, telephones, PA systems, and IoT devices.

Features

Examples of what the TRBOserver-Avigilon integration can accomplish:

- Simultaneously dispatch voice announcements to any analog or DMR digital 2-way radios, telephones, PAs, and text messages to groups or individual DMR radios
- Acknowledge or trigger alarms from Motorola MOTOTRBO radios
- Trigger alarms via telephone with a simple code
- Alarms activate relays via radio telemetry
- Receive POS text notifications on ACC clients, including faulty machinery, fire, NOAA severe weather reports, and emergency alerts
- Direct alarms to the most appropriate destination with time- and content-specific rules

Benefits

TRBOserver:

- Integrates the capabilities of multiple systems into one single solution to enable simpler, more affordable, and reliable deployments.
- Delivers additional radio-centric capabilities such as emergency / mandown / loneworker alerts, telephone interconnect, indoor/outdoor location, job ticketing, employee accountability and safety, as well as alarms from fire panels, HVAC, BDAs, and malfunctioning equipment
- Future-proofs the ever-changing requirements of any organization

Value

Propositions

TRBOserver automates the distribution of notifications and brings them in the most efficient way to the appropriate parties at the time.

The end goal is to more efficiently act on events, improving situational awareness, employee safety, and loss prevention, while reaching any part of an organization.

Requirements	Details
On-premise solution	TABLETmedia TRBOserver version 3.7.59
	Avigilon ACC version 7 (7.14.10.8)
Regional availability	Americas (NA and LATAM), Europe, Asia and Africa

UNIQUE EXPERIENCE

Understanding the critical requirements of your business, we have grown by listening and appreciating your trust. We can only make great products if they need no support or, as needed, we are there to promptly help you. Since 2001 we have provided device manufacturers, dealers and end-customers with best-in-class prompt and hands-on support. All of our products are developed by us, right here in the USA. They are tightly integrated and modular to scale seamlessly and meet your requirements now and in the future.
