SAFER BUILDINGS COALITION™ 9-1-1 inside™

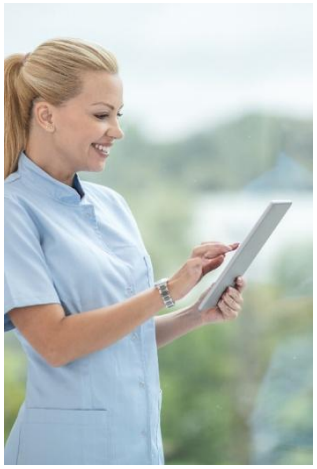
AUTHORIZED APPLICATION PROVIDER MOTOTRBO™ MOTOROLA SOLUTIONS

TRBOtasks

Assign. Track. Escalate. Close.

A radio call is the fastest way to ask for something and the easiest thing to forget. The moment the conversation ends, no one knows who was asked, whether they accepted, or whether the work was ever finished.

TRBOtasks turns that same request into a task with an owner, a status, and a timestamp. Supervisors and dispatchers assign work from a browser, and the task arrives on the worker's radio display, giving a voice device a second job. The payoff is responsiveness you can see rather than assume — a shorter path from request to action, fewer things quietly dropped, and at the end of the week a set of numbers instead of an argument.



Features:

- Create and assign job tickets from a browser-based dispatch interface
- Monitor acknowledgments, status, progress, and completion in real time
- Reassign work to available resources and escalate when action is required

Benefits

- **One workflow from dispatcher to field.** Create, assign, monitor, reassign, escalate, and close work from one TRBOserver-connected interface.
- **Role-based web access.** Different login types give dispatchers, supervisors, and other users the views and permissions appropriate to their responsibilities.
- **Use the resources you already have.** Deliver structured work directly to MOTOTRBO radio users and receive acknowledgments, responses, and status updates back from the field.
- **Escalation and accountability.** Escalation rules keep important tickets from being overlooked, and every ticket carries a time-stamped record of who did what.
- **100% on-premises.** Your ticket history never leaves your building.

Value proposition

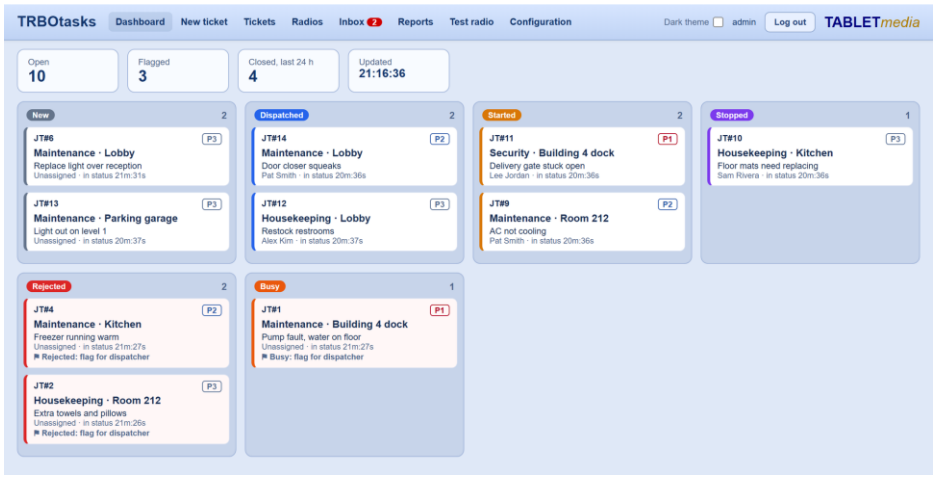
- **Every task assigned. Every response tracked.**

HOSPITALITY
Send housekeeping, maintenance, and guest-request jobs straight to the radio a staff member is carrying. Confirm completion without a voice call.

MANUFACTURING
Send maintenance, production, and material-handling jobs directly to radio users. Reassign as priorities change and keep supervisors informed.

HEALTHCARE
Assign transport, facilities, environmental services, and security tasks to available staff, escalating time-sensitive work.

UTILITIES
Dispatch service tickets to crews, redirect assignments to available resources, and escalate urgent or overdue work.



WORKFLOW CAPABILITIES
TRBOtasks connects browser users and MOTOTRBO radio users through TRBOserver.

FUNCTION	CAPABILITY
Web Users	Different login types and permissions for dispatchers, supervisors, and other users
Ticket Assignment	Create tickets and assign them to the appropriate radio user or available resource
Radio Response	Receive acknowledgments, responses, and status updates from MOTOTRBO users
Live Status	See open, acknowledged, in-progress, and completed work from the web interface
Reassignment	Move tickets to another available resource as priorities or staffing change
Escalation	Escalate priority, overdue, or unresolved work according to operational workflow
Shared Radios	User sign-in associates a worker with a shared radio for accountability
History	A time-stamped record of ticket activity, responses, and completion

DEPLOYMENT & MANAGEMENT

Hosted with TRBOserver
Runs on the same system as TRBOserver. One box, one place to look for the radios and the work they are doing.

Role-based web access
Different user login types support dispatch, supervision, monitoring, and administration, with the access appropriate to each role.

Dispatch and monitor from one screen
Assign tickets, watch their status, confirm completion, and move work to another available resource as operational needs change.

Developed & Supported in the United States of America
