

## WorkSafe™

Maintaining accountability and safety in the workplace

MAKE RADIOS PART OF YOUR SAFETY PROTOCOLS

When the ignition is turned on, cars display a safety message on the dashboard and play tones to buckle seatbelts. Similarly, WorkSafe is a 3-step solution that prompts action via audible and message-based notifications.

### TRACK RADIO USE

When employees start work, they turn on the radio and are prompted with repeated "Please sign in" texts until they sign in with their employee ID. They then receive either "John Smith has successfully signed in Portable 59" or "Invalid ID 1234567. Please try again." messages.

It enables employers to track of who last used the radio when it is lost or found broken.

### ENSURE EMPLOYEE SAFETY

Employees are sent a one-time text notification or a list to questions to which they reply with a simple YES or NO button press. For instance: "Are you wearing your safety equipment?" or "Are you smelling gas?". A NO reply immediately notifies a supervisor.

### ENSURE EMPLOYEES REMAIN ALERT

In addition, a "Safety first: check your CO2 sensor" reminder message is sent every few hours.

Better than signs and posters that are easily overlooked over time, WorkSafe brings safety right into the hands of employees and stays with them through their shift.

### ACCOUNTING

All activity is logged for recordkeeping purposes.

Sign-in is particularly well-suited when sharing radios between shifts.

### FUTURE PROOF FLEXIBILITY

The solution is fully configurable, including all notification, replies, and timings.

The employee database can be easily managed and the log is in spreadsheet format for easier manipulation.

### ADDITIONAL BENEFITS

WorkSafe is one of the many features of TABLETmedia's TRBOserver. Most 2-way radio systems can benefit from its many additional features such as advanced telephone interconnect, mass notification, alert control system, indoor location, GPS export, job ticketing, email gateway and call recording.

## FEATURES

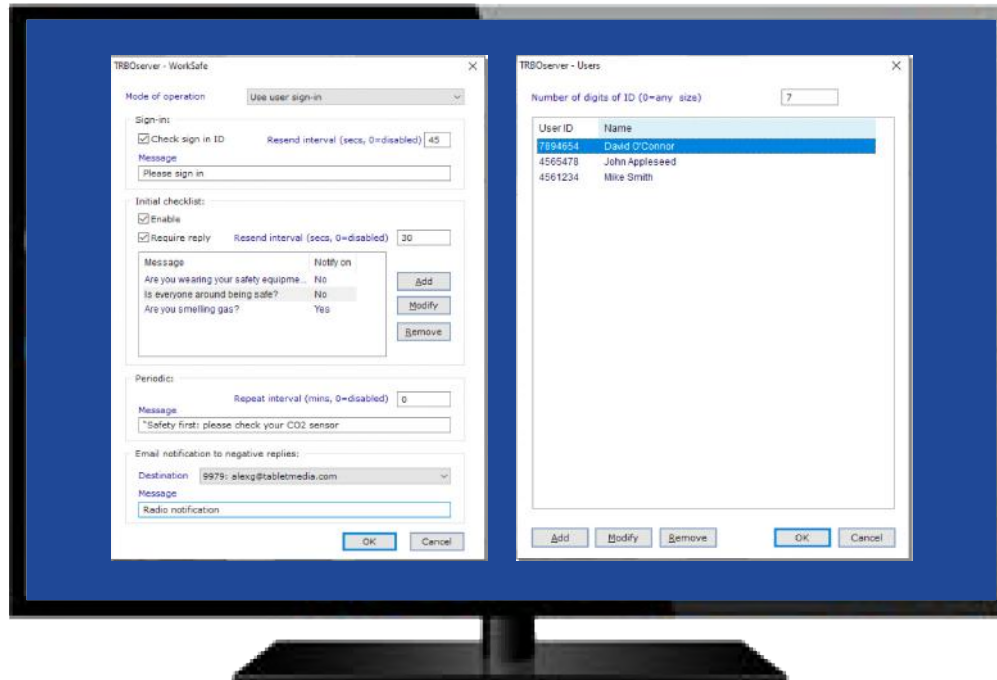

- All messages and timers are programmable
- Responses can be individually configured with canned replies
- User sign-in mode requires numeric IDs (SL/XPR7550 and R7 only)
- Periodic notifications are in the form of emails, SMS, voice announcements, telephone calls, PA calls, and other events.

## REQUIREMENTS

- MS Windows 10 or greater
- MOTOTRBO control station or data NAI repeater interface
- Display radios (SL/XPR 3500/7500 and R7)

## PROFESSIONAL SERVICES:

Customizations available for special requirements

## UNIQUE EXPERIENCE

Understanding the critical requirements of your business, we have grown by listening and appreciating your trust. We can only make great products if they need no support or, as needed, we are there to promptly help you. Since 2001 we have provided device manufacturers, dealers, and end-customers best-in-class prompt and hands-on support. All of our products are developed by us, right here in the USA. They are tightly integrated and modular to scale seamlessly and meet your requirements now and in the future.

Developed and Supported in the  
United States of America
